Paint Arena

Ong Innovations

Paint Arena is the first ever Windows Mixed Reality app that lets people of all ages paint in 3D in a shared social experience with voice chat, on both HoloLens and Immersive (VR) Windows Mixed Reality headsets, from all over the world. Teleport around, explore the arena, have a conversation, or do a silly dance together. Once you are ready, join into the arena for a casual game. Simply guess what someone else is drawing or draw something for others to guess. Now available in Microsoft Store
